Opening up SCIENCE for ALL!

Our Vision: For people to be co-producing & sharing actionable knowledge to address environmental challenges through involvement in all stages of the research process.

We need a step change in engagement and sharing.

Innovation & horizon scanning.

Networking, communication & networking.

Collaboration & sharing.

Listening, engaging environment.

Emerging activities.

Existing activities.

Collaborate, working together.

Shared values & common purpose.

Activities still to be imagined.

We are the champions.

Bringing new people in.

Sharing our successes & failures.

Legacy.

A movement rather than an institute.

Language.

Visibility & recognition.

Championing & advocacy.

How we visualise & tell stories.

Dance card.

Supporting those working around citizen science & participatory public engagement.

National community.
